BEYOND THE SQUARE

MOSAIC COLLECTION

ABOVE: MT1541 CARRARA PORC CHEVRON MATT MOSAIC

IMPORTANT INFORMATION:

Please note that images are indicative only and may vary in colour and size from our brochure. We recommend seeing a sample before ordering. This catalogue was current at time of printing, we cannot guarantee products will be available so please check products before selecting. Box sizing may vary per shipment, please confirm box sizes when ordering.

GLOSS GLAZED PORCELAIN:

Gloss glazed porcelain mosaics can be used in light traffic areas (like ensuites), bare foot traffic as they are prone to scratch. This is especially prominent in the Black Gloss finish.

MARBLE/NATURAL STONE:

Many of our mosaics are natural stone or have an element of natural stone in them. Natural stone requires special installation and ongoing maintenance. As these are natural products they may age with time and wear (depending on the application), this includes wear if installed on floors, marking, staining and damage. If care is taken with usage, cleaning and regular sealing your stone will last you a lifetime. NOTE: All natural stone requires sealing!

METAL:

Due to the nature of metals, please note that they will react as any metal normally would because of this ***we do not recommend our metal mosaics be used in wet areas***. Specific installation and ongoing maintenance is required as these are metal and must be treated as such. These products will naturally age over time and react/oxidize to the environment, a special cleaning regime is required to ensure your mosaics look stunning in the future.

Please feel free to contact us for technical information info@midastiles.co.nz.
